Woodstock Chimes® Enhances Popular *Environments Collection* with Latest Bell Additions

(Shokan, N.Y.) -- Woodstock Chimes, a leading manufacturer of precision-tuned windchimes, introduces two new bells to its popular *Environments Collection* as part of the company's 2008 summer product introduction. Both the *Woodstock Mission Bells™ Amber* and *Woodstock Bells of Morocco™* continue to maintain the collection's purpose of creating gentle, calming sounds.

“With the increasing interest in eastern world style, expanding the **Environments Collection** allowed us to further combine tranquil sounds with an ingenious look inspired by the eastern culture,” says Woodstock CEO Garry Kvistad. “Continually developing bells for the collection is a welcomed challenge; it allows our company to be imaginative, while melding impeccable musical sound and innovative looks that appeal to those with a more eclectic taste.”

The strong design of the *Woodstock Bells of Morocco™* works with gentle soothing tones to bring a bit of the mystery of a Marrakesh home. Rich colors and exotic spices blend to make a texture that is truly Moroccan. The classic *Woodstock Mission Bells™* is available in black, copper and now amber tones, and features a symmetrical, slanting plane design with genuine stone accents. Like other designs that evolved during the early 20th century, the *Mission Bells™* places heavy emphasis on simplicity, quality, function and harmony with nature. Both handcrafted bells are designed to ring with the wind, making a lovely addition to any home or garden.
