**Woodstock Chimes® Introduces Latest Instrument Addition to
*Environments Collection***

Pipedream™ Java creates serene environment with enchanting sounds

(Shokan, N.Y.) -- Woodstock Chimes, a leading manufacturer of precision-tuned windchimes, surges forward with its top selling **Environments Collection** adding a new distinctive instrument to its *Pipedream Series* called *Pipedream™ Java*. This carefully designed, precision tuned instrument allows any individual to create their own harmony and surround themselves with peaceful sounds.

“The Pipedream Java instrument continues the mission of our *Environments Collection* – healing through sound,” says Woodstock CEO Garry Kvistad. “The power of musical sound is often disregarded, and we strive to remind those that soothing sounds are essential to a calm and relaxed spirit.”

The Pipedream™ Java’s winning design harmonizes with enchanting tuning to deliver an instrument that is not only pleasing to the eye, but also enjoyable to play. Tuned to the musical scale of the *gamelan degung*, a traditional Javanese ensemble, with a few strokes of the instrument’s mallets, one can create fascinating tunes that sound like those straight from the South Pacific!

This beautiful sounding instrument is ideal for musical improvisation and self-discovery. Measured at 20-inches-long and 12-inches-wide, it is made with the same precision-tuned tubes that Woodstock Chimes® uses in its world famous windchimes. The suggested retail pricing for the Pipedream™ Java is \$77.
