Woodstock Chimes announces the introduction of its **Fountasia® Water Sculptures** for 2007. The sculptures utilize a unique process that combines real granite stone with reinforced fiberglass. The result is a beautiful, natural look with a lightweight, durable construction. The 12-inch *Mushroom Fountain* delights the eyes and ears as water runs across the top and splashes into the pool below. The *Pebble Fountain Collection* and *Ball & Column Fountain Collection* are offered in small, medium and large sizes and feature attractive LED lights that automatically turn on at night, producing mesmerizing patterns as the water flows. The fountains are low-maintenance, thanks to LED lights that never need replacing, and add a dramatic accent to any garden or patio.

Woodstock Chimes has also introduced a collection of fountains for indoors and tabletops. The *Four Tier Fountain* features a pyramid design and sandstone finish. Water hugs the finish on the *Sphere Fountain*, producing soothing, relaxing sounds. The *Tower Fountain* features a stacked-granite pattern for water to gently trickle down. Both the *Sphere Fountain* and the *Tower Fountain* are available in sandstone or black.
