

WOODSTOCK TREE BRANCH HANGER (TBH)

Mounting Instructions

- 1) These instructions are for using the hardware provided to mount the Woodstock Tree Branch Hanger onto a solid wood surface. If you are mounting onto another material such as masonry or drywall, please consult your local hardware supplier for the appropriate fastener.
- 2) Using the mounting bracket (1) as a template, mark the three holes at the height you plan to mount the wall hanger.
- 3) Using a 5/32" drill bit, drill three pilot holes 1" deep.
- 4) Use the three screws provided to mount the bracket onto the wall.
- 5) Insert the angled end of the branch (2) into the socket on the bracket.
- 6) Hand tighten the screw (1B) on the socket to lock the branch in place.
- 7) When mounted onto solid wood using the hardware provided, this bracket is designed to hold one large chime or several small chimes with a total weight not to exceed eight pounds.
