An Improvisation Instrument
From Woodstock Percussion, Inc.,
makers of the original precision-tuned Woodstock Chimes®

We hope you love playing the Pipedream as much as we enjoy making it. The Pipedream is a great instrument for self-expression and discovery. Its scale is rooted in the music of ancient civilizations, which may not be as familiar to you as the modern western piano scale. The Pipedream is a very accessible improvisational instrument. There is no limit to the compositions you can create.

Throughout history, originality has been a sign of great art. For this reason, think of Pipedream as a free-form instrument. There are no rules—as simple as it is to play a single note, you can also make up your own song, long or short. With improvisation, you can respond to what you are hearing around you or what you are feeling at the moment.

Everyone doodles on paper from time to time, freely and without self-consciousness. Imagine the Pipedream as an empty pad of paper on which you are taking notes. As you listen to your environment, jot down ideas, scribble images and document your experiences. You may discover other familiar melodies on Pipedream as you improvise. Who knows, the Pipedream may be the instrument that brings out the musician inside you.
